Please share your comment below for any related query or you can even ask for support for you key Â as well as crackÂ .

you can send us email to Q: How to assign an object to a dynamically created asp:Label? If I create an asp:Label dynamically, how can I assign the label to a given object? The string indexer doesn't work with labels. Label label = new Label(); label.Text = "Test"; myLabel.Controls.Add(label); A: The label needs to be added to the list of controls of the Form prior to calling the Add method. The Controls collection is the container of all controls on the form, and the Add method adds a control to the Controls collection of the form. Label label = new Label(); label.Text = "Test"; this.Controls.Add(label);

The Iranian parliament this week passed a bill prescribing the death penalty for anyone who secretly or deliberately kills the country's nuclear scientists, part of a campaign to deter US and Israeli spying and sabotage, according to Iranian officials. Executions for the crimes would be carried out within 15 days of the intended perpetrator being caught. Tehran has accused the US and Israel of trying to sabotage its nuclear programme through assassinations,
