This article offers tips and advice for better images in Photoshop CC: Learn the Basics Before Experiencing Creative Media Production There's no better way to learn Photoshop than to start with an easy project. A good place to start is with turning your image into a black-and-white version. While many creative media programs enable you to go beyond black and white to other grayscale tones, that's not the case in Photoshop. Photoshop is a bitmap editing application, which means it stores all the information as a series of pixels. Black and white is the most basic Photoshop tone, from which other tones can be derived. Blending Layers Before we move on to the main Photoshop tips, let's take a step back and see how Photoshop's layers work. Layers are used to construct an image and to edit it after it has been constructed. In earlier versions of Photoshop, you could easily edit an image after it was made. You would just add a layer to the image and do your changes. However, the new version of Photoshop gives you far more control. When you perform most edits, you make changes to individual layers. Doing this enables you to change the entire image by editing only the one layer that is showing. How to Edit a Layer in Photoshop This tutorial will explain how to perform the basic steps involved in editing a layer in Photoshop. These steps are for the most part common to all Photoshop programs, but a few things may be in a different position. Start by creating a new document. To do this, choose File > New from the menu bar. You can choose to work on a new Photoshop document and change the size of the image afterward; this is not necessary. Alternatively, you can open an existing file in Photoshop's default preset settings. The New Document Window provides settings for opening the image that was selected in the previous step. After creating the new image, you can choose a theme. Photoshop has a large collection of optional themes, allowing you to quickly switch between different looks. You can easily explore these themes by selecting the More button in the dialog box shown in the next step. The More button opens a dialog box in which you can see the available Photoshop themes. Choose a theme by clicking on it in the More box. You can adjust the number of colors by clicking on the down arrow and adjusting the drop-down menu. You can also adjust the amount

In this Photoshop tutorial, you'll learn how to use Layer Masks to make a photograph look as if the blur was applied with an aperture. To create a blur look, you need to use the camera aperture size in your photo. Introduction: Layer Masks One of the most important tools in Photoshop is Layer Masks. You can use them to quickly remove unwanted parts of an image. When this is done, new parts can then be added to the original photo, allowing you to create any new or modified photo. To create a new Layer Mask, select Layer Mask from the Layers panel. You can select multiple Layers and create a new Layer Mask. Or you can select a Layer Mask by double-clicking the Layer Mask icon. Drag the Layer Mask so it surrounds the area you want to work with. You have two main options. You can either apply the Mask to the Layer below or the Layer above. The difference between the two is that moving the Mask to the bottom of the stack only allows you to edit the Layer below. Moving it to the top allows you to edit any Layer below and above. This will reveal the area you want to edit and leave the rest of the image untouched. You can edit the Layer Mask using the Layer Mask options window. This window will open when you select Layer Mask from the Layers panel. Like most of the Photoshop menus, you can either select a tool from the top of the menu or using the keyboard shortcuts. For this tutorial, you'll open the Layer Mask options using the keyboard shortcut. You can also use the options window to edit Layer Masks. As with the tools, there are a range of functions that you can choose from. The options window will contain two options. Layer Mask and the Off option to turn the Layer Mask off. The Background Layer Opacity option will allow you to set the opacity of the background. Changing the opacity will change how transparent the Layer Mask is, depending on the amount of background that is still visible. When setting the Background Opacity to 0% or 100%, you can create very transparent or opaque Layer Masks. You can also set the Opacity of the Layer Mask to a specific value, although you cannot change the Layer Opacity of a Layer Mask. Instead, you have to delete the Layer Mask in the Layers panel. Posting ads on a popular social network could turn the tables for law enforcement in the next edition of the Silk Road heist case. An online ad posted last week offering a reward of up to \$10 million for evidence leading to the arrest of anyone involved in the 2014 hack and sale of more than \$325 million worth of the online drug market Silk Road has been scanned by detectives and forensics specialists in at least two states, said two law enforcement officials who spoke on condition of anonymity. Silk Road, which offered encrypted and anonymous access to illegal goods, drugs, and services on the Internet, was shut down last year. The FBI's indictment against its alleged mastermind, Dread Pirate Roberts, and other accomplices shows that he hacked into the servers of the dark web site. The auction, which attracted about 400 advertisers, could have been the first such law enforcement-led bidding process in the United States, said the officials. It was set up by the Internet Crimes Against Children Task Force and the International Consortium of Investigative Journalists, which obtained a copy of the ad. The posting, which ended Wednesday, offered a \$500,000 reward for identifying and reporting any who helped with the hack. "It shows the evolution of online crime," said Bill Sweetland, the agency's director in New Hampshire. His state's law enforcement agencies, including the State Police, were also investigating, he said. Mr. Sweetland said it was unclear who was responsible for the hacking, but his agency believed the site itself had been hacked by more than one individual. If the auction is successful, detectives will be able to create a map of IP addresses that were accessed by scammers and could serve as the basis for follow-up investigations and the prosecution of those who carried out the hack, he added. "We get requests on an almost daily basis for IP addresses to be investigated," Mr. Sweetland said, "and this is one way to solve the puzzle in a more expedient and economical fashion." A separate law enforcement source in New Jersey said the task force was investigating the posting, though it did not offer any details. The New Jersey Internet Crimes Against Children Task Force is investigating similar activities, including auctions, across the United States, according to a spokeswoman for the agency, which operates out of the state's attorney general's office. What's New in the Adobe Photoshop CS4?

Ohio State just routed Kansas, 57-24, behind a strong performance from quarterback Braxton Miller. Kansas coach David Beaty shouldn't have been surprised. It has had a plan in place to try and stop Miller and the Buckeyes offense throughout the season and it really showed itself in his statement after the game. "We knew (Miller) was going to be good," Beaty told the Post-Dispatch. "We knew they had a great offense. We knew they had an offense that beat Alabama, an offense that's one of the best in the country. But we thought we could compete." Here's Beaty's assessment of Ohio State and their offense during their win at No. 3 Alabama and Saturday against Kansas: Offensively, they were really good and one of the best in the country. But they were inconsistent in the first half of the game. They got 20 points, but it wasn't one of those dominant fourth-quarter runs they are known for. It's one of those games where they were good for one drive, then they had a big drop-off in the second half. It really showed up at Alabama when they got to the end zone on the last play of the first half. They didn't get any points, which was expected. But that trend continued Saturday. "They are a great football team, as is everybody at Ohio State," he said. "They are a great football team, there's no question about it." It was hardly a dominating performance by Miller, as he threw for 175 yards and rushed for 70. He did throw two interceptions in the first half as Ohio State had a quick 30-0 lead over the Jayhawks. But after halftime, Miller continued to impress and he's clearly the Buckeyes' main weapon. "He is a game-changer," Beaty said. "He is very competitive and he brings a whole new dimension to what we do. He made some big plays in the second half. He made some big plays in the first half. I thought he was great." Beaty also got to face another big-time quarterback in his statement. Miller's replacement in Columbus, J.T. Barrett is redshirting this season.
