If you want to remove a file from a project, create a new instance of the unit and add it to the project. For example, if you added the unit "Text.pas" to the project, you would create a new instance of the text unit and use that to add the file you want to delete. This is a quick way to clean up your project without losing the hard work you put into it. Three of the five Windows Live Essentials updates have already been released, but now it's time to update our Windows Live SkyDrive app so you can upload your files straight from the Windows Live App. If you haven't updated the Windows Live SkyDrive app, be sure to check out Windows Live SkyDrive, because it has all the features of the desktop client, plus it's designed for more intuitive navigation. Check out the Mac version of the app for even more online storage options. Windows Live SkyDrive is a native app that runs inside the context of your browser. So there's no need to leave your browser to upload files and check your photos. You can also use Windows Live SkyDrive to publish videos from any app you use, including your video editing apps. After you've updated, you can continue your usual SkyDrive activities. You can still: - Browse your SkyDrive photos and photos by people in your life. - View your SkyDrive documents and videos. - Create a new video or upload existing ones. - Share your SkyDrive photos and videos to any site or service that lets you send attachments. If you want to change things, you can always open the Windows Live SkyDrive app to manage your account.
