
Hasp HI Dongle Emulator 31

December 19, 2018 - I've been using the X64 HASP HL multi-key key emulator on my Windows 7 x64 machine for a while now. The software I use is HASP ... HASP HL. The emulator allows me to run the application to do what I need. I am not a developer. I have a 1 month license. I bought a key through an online store. I get all the messages I need but I don't get them when I am running the emulator. My question is why? After pressing the start button (or stop button or whatever) in my emulator, I get "Application not installed", "Application error" or something like that.
