Usenet Radio

Play audio files from Usenet and keep listening to your favorite radio stations. Users Review 1.0 "Easy to use" Full Review | Rating: 5 Paul May 15th, 2018 Great way to listen to music and podcasts Coincidentally, I have been looking for a way to listen to podcasts, and this has been one of the best programs I have found. I cannot think of a single reason why you should not use this program. It is an excellent product. The instructions to use the program are very detailed and clear. The software is easy to use and the menus are simple to navigate. Cons: There is a lack of customization. If you are looking for a lot of options, this program might not be for you. 0 of 0 people found this review helpful John May 15th, 2018 Delivers "real" radio Very happy with the app, it is perfect for my needs, works as advertised and has much more flexibility than free alternatives I have used. Cons: Downloads required! It would be nice to have the files "in the cloud", rather than needing to download them every time I want to listen. 0 of 0 people found this review helpful Brandon May 9th, 2018 Great App I had a receiver for my desk, on which I would listen to a wide variety of radio stations from all over the world. There was no way to tell which station was coming through the receiver. I am excited to have a way to listen to radio like this on a computer. I was looking for an app which was simple and easy to use. This meets all of my criteria. Cons: No idea 0 of 0 people found this review helpful Jude May 5th, 2018 Sort of a novelty I have used a few applications over the years to listen to radio, but this is the first one that I have found that actually worked. It doesn't do a lot other than play my favorite local radio station. But it does that pretty well. Pros: Easy to use 0 of 0 people found this review helpful Sean April 25th, 2018 Great option to listen to live radio I am a big fan of radio shows and such, which is why

What's New In?

If you're a radio enthusiast and you own a Usenet account, you might combine the two by turning to Usenet Radio, which enables you to play audio files from Usenet like you were listening to a radio station. Easy to install Installing this product on the target computer should pose no difficulty, not even for inexperienced users, since it only requires you to launch the setup utility and follow the on-screen instructions. During the setup, you can define the destination folder where the app should be deployed to, and at the end of the process you can set the program to be launched automatically after the installation is done. Simplistic interface Visually-wise, this app doesn't exactly stand out, as it boasts a pretty simple, familiar layout, which will make it even easier for novices to handle its controls without significant efforts. More so, after you launch Usenet Radio, you can view a demo on how the app works and how it should be used, in order to familiarize yourself faster with its controls. Plays audio files from Usenet Considering that you already have a Usenet account, you can type your credentials when you launch the application, so that it can connect to the servers and fetch the desired data. The app actually connects to several newsfeeds, fetches audio files and plays them continuously, simulating a real radio station that you can easily control from the main screen. Handy Usenet audio player All in all, if you're looking for a tool that can help you play audio files directly from Usenet and make you feel like you're listening to a radio station, you should consider giving Usenet Radio a try. It can be installed on the target computer without significant efforts and its interface, although rather plain, ensures that even novices can make use of its functions.
