However, the absence of spermatozoa in the ejaculate does not always mean infertility. This opinion article summarises semen quality, some causes of infertility, and the possible options for the infertile couple. What does it take to make a good sperm? [#cesec10] ===================================== It takes a whole army of cells to make a semen sample and the most prevalent cells in semen are those from the germ cells and not the somatic cells. A well-mixed ejaculate is rich in sperm and it is very hard to get into this state in the laboratory. Collecting semen for analysis should be a normal part of sexual relations, not something that is usually done in isolation, and it should be very clearly understood that collection is an important part of the analysis. Semen analysis has diagnostic as well as clinical applications, the former being much less well understood. People choose to have intercourse at times that are best for them and may include the need for extended abstinence, the presence of ejaculation disorders such as retrograde ejaculation or sexual abstinence, the use of medication, and the presence of a specific infection such as chlamydia or a sexually transmitted infection (STI).
