AutoCAD Serial Key [Latest-2022]

Since the 2013 release of AutoCAD Full Crack 2010 and 2017, the most common platforms for

AutoCAD use are Apple computers (PC compatibility was no longer supported in AutoCAD 2017) and Windows operating systems. Language, APIs, and technology The AutoCAD R2012 was based on a proprietary LISP called ObjectARX (Autodesk, Inc. Automatic Computer ObjectARX), developed at MIT. The R2013, R2014, and R2016 followed the same engine, but with different GUI; however, ObjectARX was still used. AutoCAD provides a visual interface to the object-oriented programming language Lisp. ObjectARX is a proprietary dialect of Lisp, which runs on the ObjectARX Compiler (OBJC) and is used in AutoCAD. AutoCAD offers several different APIs including ObjectARX, Visual LISP (VLL), Visual Basic (VB), .NET, and ActiveX. AutoCAD R2009 introduced the webworks programmable interface, an open-source programming language based on JavaScript. This language is also compatible with visual LISP. AutoLISP is an extension to the AutoCAD R2009 which runs on the ObjectARX Compiler (OBJC). VB, a dialect of Visual Basic, was introduced with AutoCAD 2010 for use in applications that require greater performance. AutoCAD 2011 introduced .NET; this variant of Visual Basic can be used in an AutoCAD 2010 application (VB6 or VB.NET) and in an AutoCAD R2009 application (VB.NET). AutoCAD Architecture (formerly AutoCAD Architecture 3D) uses the same engines as AutoCAD, but with a new UI that is specifically designed for 3D architecture. AutoCAD Architecture was launched in 2007. AutoCAD Architecture 3D is based on the same ObjectARX engine as AutoCAD. AutoCAD Electrical is a graphics-based electrical design automation application. It includes basic tools for the design of linear and non-linear electrical circuits. AutoCAD LT is a line-oriented CAD software application that is used in the area of architectural, mechanical, and civil engineering. AutoCAD Map 3D AutoCAD Map 3D is a desktop application that was released in 2005. It was replaced by the ArcGIS desktop application for desktop mapping, which was launched in March 2013. It was a free ca3bfb1094

AutoCAD Crack X64 [Updated] 2022

Q: python3 parsing text file I'm writing a script in python3 which needs to read a text file. The text file is in a particular format: [{ "id": "f001", "name": "Car1", "color": "green", "Year": "2001" }, { "id": "f002", "name": "Car2", "color": "black", "Year": "2000" }, { "id": "f003", "name": "Car3", "color": "blue", "Year": "2000" }, { "id": "f004", "name": "Car4", "color": "black", "Year": "2002" }] Notice the year is in the ["Year","2001"] format. I want to loop through each line and parse out the id,name and color, which are in the format {"id":"f001","name":"Car1","color":"green","year":2001} ... how do I go about this? A: Here is one way to do this: from collections import namedtuple import json # Just an example data = "" [{ "id": "f001", "name": "Car1", "color": "green", "Year": "2001" }, { "id": "f002",
