By Kevin D. Rost. Within the comprehensive account of the development of Western business. practical subject of economic analysis, for learning and teaching, business and .1. Field of the Invention The present invention relates to a liquid crystal display and a fabricating method thereof. More particularly, the present invention relates to a liquid crystal display capable of preventing an electrostatic discharge and a fabricating method thereof. 2. Description of Related Art In conventional, thin film transistors in a liquid crystal display usually include gate electrodes and source and drain electrodes fabricated by etching processes. Such a fabrication process requires a large number of fabrication steps and much more photo-masks, resulting in a high production cost. Therefore, there is a need of providing a liquid crystal display capable of overcoming the aforementioned problems. "Surprising no one," "non-controversial," or "acceptable to everyone" has become code for "what could possibly be offensive?" or "what could possibly cause a problem?" Take the President's proposal on immigration, for example, which prompted both a "call to ban [him] from 648931e174
