A special edition of the Microsoft Dot.NET Framework 4, with .NET Standard 2.0 capabilities As its name suggests, a special edition of the Microsoft Dot.NET Framework 4.6, which was released in June 2015, was designed in order to facilitate the development of applications that use the .NET Standard 2.0 framework, which, as we've stated before, was officially launched on November 6th, 2015. Being installed, a special version of the .NET Framework 4.6 will be downloaded and installed alongside the already installed version, so you'll be able to reference both of them.
