### **Elden Ring Features Key:**

#### **Avatar Customization**

It is possible to freely change the color, style, accessories, and hairstyle of your character. You can also create a friendlier or more fierce pose.

#### **Combat Action and Skill System**

Combat Action, which is a virtual sport of the stratagems of warriors. Combat Action is a skill-based system that allows you to use the arts of battle. By referring to the skills learned on the way, you can then easily improvise by controlling the combat action and overcome strategic challenges.

#### **The EverChanging World**

The world unfolds in a constant flux. You can freely travel to new places and meet a vast number of evil servants.

#### **Moderate Interface Quality**

The interface is simple and easy to understand but is not too difficult to operate. The auto-translations are fairly correct while they can be felt confusing to users, so if it is cumbersome for you do not worry.

#### **Stratagems**

You can use stratagems to enhance your attack power, meaning the powerful attack actions of intelligence and wisdom. Each stratagem has a clear function and let you know what they are going to accomplish. Although, if you have learned all of the stratagems, you might not be required to use them and can engage in a simple fight so you may need to take that into consideration. This game will be fully patched before it is officially released. Every game update after the patch is a new game version so please keep a close eye on the announcements to make sure that the patch will work for you.

### **What's new:**

**Eldenistia is a fork of the game Tarnished. See the wiki for more information, or visit**

### **Peroson Behind Descension**

**Be it a 2D student illustration or a painful process, bringing life to this world is everything I can do. I am Shinta, an artist who has been in the game industry for over 2 years with no time in the middle. I am a part of the team behind Descension and work at Hornel Games in Nagoya. Being a lone wolf in this company makes me feel a bit lonely, but thanks to all of you, this place is filled with many lively people! Personally, I like dark colors and somewhat chunky things. I owe you all a heartfelt apology for not developing enough. Next time I will make sure.**

### **Kurogane Diary (in process)**

**In my freshman year of high school, I met Sonari, who would later become one of my best friends. When I was drawing one day, he introduced me to his "painter" friend Sota. We were debating whether to buy European games or Japanese titles for the new consoles and decided that we wanted to buy both. That was the first time I used a microphone and voice input, and it was fun! I wanted to continue making games and thought the amateur venture was interesting, so I joined Freebird Studios during my senior year of high school. After working for a year I quit because I wanted to move on and pursue a career as a mechanic. This was when I decided to study BS and join a maintenance company.**

**I met Hornel during work promotion when I was about to quit and was struggling to find a job. I had a "heart for fantasy" so I wanted to join this development team. My first tasks were to draw the scrapped title illustrations. I learned a lot here, but I did not have the chance to work on a huge project. Following an even bigger drawing project, I was on a two-year hiatus. Rejoining the company I finally became responsible for something that I also had the smallest part of the art team!**
