(Source: CNN) MOSCOW — When a stream of North Korean defectors tries to reach Russia's southern border near the end of summer and autumn, the most traumatic period of a person's life is often about to begin: The reunion with their loved ones. cell phone for whatever reason, they can call their supervisors on the ground. I'm sure this would be an incredible inconvenience, but you really have to ask yourself: How serious a problem is this to the crew? What's more important to them getting a phone working or keeping their passengers happy? 7) The Passenger Security Checkpoint Now, let's take a trip back to the

year 2001. This was the year that United States enacted the so-called Patriot Act, which altered the way travelers around the world were treated when they entered the US.
