jQuery DataTables search box behaviour on click I have a DataTables grid with search boxes that perform a search upon an input and then display results using the same input. The issue is that, the search and display buttons (actually the input) seems to coincide and not have a different behaviour. For example, if I search for "Test" then it will display the rows where "Test" occurs but the search will not occur. The thing is that there are no different clicks needed to perform each operation. How can I

make sure that the same input will act as a search input and a display input? Here is my code:

```
$(document).ready(function() { var datatable = $('#expedition'); datatable.clear();  
datatable.DataTable({ "destroy": true, "dom": 'Bfrtip', "data": [{ "temperature": 29.0, "name":  
'Test_1' }, { "temperature": 18.0, "name": 'Test_2' }, { "temperature": 20.0, "name": 'Test_3' }, {  
'temperature': 18.0, "name": 'Test_4' }, ], "columns": [{ 'data': 'temperature' }, { 'data': 'name',  
"searchable": false }], "column
```
