Land, sea and air combat take place in single- and multiplayer across 60 missions and nine scenarios. As the Axis and Allies players, you'll fight alongside Italy and other Axis powers during the Spanish Civil War (as Juan Manuel Fangio does in a special mission) and in Italy during the Second World War. In the East African campaign you'll battle Axis troops in Eritrea and Kenya, while British and French forces try to claw their way back out of Libya, where you'll form the backbone of the French 9th and 10th Armies, fighting on the beaches, in the fields, in the ghettos and in the shadows. By joining the forces of Italy, Germany, Spain, Morocco, Tunisia and the Imperial Japanese Army, you'll have a range of allies to call on and use to your best advantage. Allied forces include the Free French, Americans, Canadians, Polish, Australians, New Zealanders, Greeks and Yank forces, but you'll also be supported by British, French and Spanish forces. Rommel's Afrika Korps, which includes paratroopers from the Folgore Division, the Hermann Göring Panzer Division and the 21st Panzer Division, led by the formidable Erwin Rommel will provide the toughest challenge. To support the Italian campaign you'll face the sleek and snub-nosed Fiat CR.42 Falco single-seater, the sweeping CANT Z.1007, the G.50 biplane and, of course, the Panzer IV tank. The game includes four new, exclusive scenarios covering the Italian North African campaign, and also the American's Torch campaign in November 1942. These are accompanied by nine pre-set scenarios. Key Features: - Detailed maps and models of the desert and other combat areas - Air and naval units, including aircraft from the German Luftwaffe and the Italian Royal Italian Navy (Regia Aeronautica) - The Axis and Allies can field a variety of squad-size and individual units, including paratroopers from Folgore, Hermann Göring, 21st Panzer and Italian artilleries. - Over 20 World War II vehicles, including the widely used Panzer IV tank, the ubiquitous British Vickers Valentine, the lightly armed Fiat CR.42 Falco single-seater, the Italian Ansaldo A.57 and the so-called Matilda, a ten-ton tank with a 14-cwt field gun - Great attention to detail c9d1549cdd

As you play the game, you will find yourself entering into the Bardo in between life and death. Like in the Bardo in the Between Life and Death game, you must collect special objects (Memento Mori) to survive until you move on to the next life. In this world, as your chariot is racing towards death you begin to explore the surrounding area. Everytime you fail in a race, you will lose a life. You will try to continue racing and avoid death, or at least fail to lose all of your lives. Which way do you want to go? Now that you have found the secret area, you can press the buttons to run on either side of your chariot! Each chariot has a different "class" of chariot. This includes the number of lives and charges at the start of each race. It also include:- Thea - Front 1-Customization on the chariot wheels and brakes - Horses - Each chariot also has a different horses. Some chariot's horses are specially bred for racing. - When you win the race, you will get a specific amount of lives and charges. - You will get a specific amount of money from winning each race. This game is free to play, but it has IAPs like the Life Pack. This is the Unlimited number of lives version. Hi, this is Alpha 1 of my first game, and I would really appreciate if you could give me some advices, especially in terms of technical aspects like viewport, shaders, light and fog effects, etc. I am trying to achieve a pre-rendered graphics, which are more like screenshots than like a video, so that's why I used the rendertarget instead of the video. Also, I could use some people to test the game, what I basically need is people to give me the functionality and the basic gameplay, and the gameplay itself is mostly a one timer, with little button to react with. It is a simple game in terms of controls, with buttons to accelerate and brakes and 2 buttons on the steering wheel, which are used to shift between the 2 classes of the chariot. Thank you very much! A re-imagining of a classic game, re-used via the Atopia Framework to create a brand new game and user experience. All assets re-used and can be downloaded from The game is designed to be a

Houdini has been in development for a year now, gathering a passionate following on Steam Greenlight.

Presence and management of obesity in two medical practice settings. The purpose of this study was to compare physician-diagnosed obesity and recommendations for weight management by physicians in an academic medical practice and a private primary care practice. A cross-sectional study was conducted in 2002 using a convenience sample of 547 adult primary care patients of a large academic medical center who were currently seeing a physician. Data were collected from patients' health histories and from physician-recorded weight and height. Descriptive statistics, the t test, and multiple logistic regression were used to describe and analyze the data. Approximately 46% of the patients were overweight and 18% were obese in the private practice, compared with 27% and 11%, respectively, in the academic practice (P
