After California, residents of five other states joined Nevada and Oregon in voting to legalize recreational marijuana. By 11:30 p.m. Friday, Hawaii was the only state that stood firm against marijuana legalization. In an effort to slow down legalization, Hawaii Attorney General Doug Chin moved for a statewide court stay of any judicial or legislative order, and also filed a joint brief with several other attorneys general defending

states' authority over public health and the rights of individual citizens. It's not clear whether the defense of individual rights will be successful at the appeals court, but it's the most recent attempt by Hawaii and the attorney general to stop the marijuana legalization initiatives from passing. The state has also sued the governor and Oregon in hopes of blocking that state's law from taking effect, as well as that state's attorney general. Republican Gov. Scott Walker, who has been cool to legalization since the outset, indicated that he's ready to wait it out. In a video statement posted on his Facebook page Friday evening, he said, "As with so many issues on the ballot, the voters will make the final decisions when the polls close tomorrow. I'll do my part to ensure that no one in the state of Wisconsin will ever get sick as a result of their decision to try to help themselves to marijuana." "The governor's actions are unwarranted and without basis in law. This lawsuit is essentially a distraction from the important issue before the court. As demonstrated by today's court filing, the governor is unwilling to accept the will of the people and continue to thwart the will of the voters," said Jonathan Anderson, executive director of the Marijuana Policy Project. "The voters of the state have spoken, so long as the legislature and governor behave responsibly there is nothing standing in the way of the start of a new era in adult use marijuana."A new firmware for the R-1 provides support for most of the new Gear S3 watch's features, including voice commands, control of the ambient display and the heart rate monitor.
