charity event called WPSSWITCHING. Leo and his family donated 50 blankets to the WPSSWITCHING charity. The children also used R2D2 and Darth Vader to ask for donations from fans in exchange for trading cards. Each child would also put on a Star Wars costume and the fans would then be asked what would be their favorite character. The children were then given a “pinch and toss” exercise to

seed cake @ the Hinds Head, London You can't really believe it when you try a new place, you have  
to guess first whether you like it or not, whether it will be fresh and tasty or just a waste of time. I've  
found that, instead of feeling nervous, I begin to love the place the more I notice its details. At the  
Hinds Head, the round cake they sell is the kind of snack I can gobble up. It's very light, with  
safflower seeds and a drizzle of oil on top.(19)F MRI of fission-fragmented spins in a cluster of (18)O  
atoms in a solid anion. (19)F spin lattices in solid Cl(-) anions have been studied using (19)F NMR.  
Because of the significant difference in Fermi energies between singlet and triplet electronic states  
of carbon and fluorine (13.6 and 23.5 kiloelectron volts), the (19)F signal of the alkali-metal fluorides  
(K, Rb, and Cs) is not expected to show substantial broadening due to inhomogeneous broadening.  
However, in a solid Cl(-) anion where the electrons are already localized, the pair of closely spaced  
fission fragments can have enough dipole-dipole and direct dipole-induced dipole interactions to  
substantially broaden the (19)F line. Using the anomalous dispersion of the (19)F line in the solid  
Cl(-) anion, Cs(-) was successfully detected and characterized with the use of homo- and  
heteronuclear two-dimensional (19)F spectroscopy.[Prevention
