Link Download: Features of Disk Drill Pro 5.11.0 Cracked Free Download Disk free tools that can recover lost files. Disk Drill Pro is the most popular disk recovery tool, with the help of which users can recover files that are lost from the drive without the need for a professional. Great Disk recovery software that is the world's best disk recovery software. Disk Drill pro is an advance disk recovery software. Disk Drill is the best disk recovery software that has been downloaded by many users around the world. Disk Drill pro is the best disk recovery software that can recover disk files that have been damaged by a virus, and damaged by a malicious file " for example.DOC files, ZIP files, etc.1. Field of the Invention The present invention relates to a semiconductor device, and more particularly, to a semiconductor device, a fabrication method thereof, and a semiconductor module including the semiconductor device. 2. Description of the Related Art In recent years, there has been proposed a technology of forming a power MOSFET (Metal Oxide Semiconductor Field Effect Transistor) element and a power IC (Integrated Circuit) chip having the power MOSFET element on the same semiconductor substrate in order to increase the integration of the power IC. FIG. 11 is a sectional view of a semiconductor module having a power IC chip and a power MOSFET element formed on the same semiconductor substrate according to a conventional technology. As shown in FIG. 11, the semiconductor module according to the conventional technology includes a first semiconductor substrate 1, a power IC chip 2, a power MOSFET element 3, a Schottky diode 4, and a second semiconductor substrate 5. The first semiconductor substrate 1 is formed by sequentially laminating a first semiconductor chip 11, a first silicon substrate 12, a first insulation film 13, and a first wiring 14. The first semiconductor chip 11 is formed by sequentially laminating a first semiconductor substrate 11, a first channel-forming region 111 and a first source region 112. The first semiconductor substrate 11 is formed by sequentially laminating a first semiconductor chip layer 11a made of silicon and a first silicon substrate layer 11b made of single crystalline silicon
