I wanted to share my experience of how I purchased my first and only computer that could run AutoCAD 2016 at that time. In January 2015, I was invited to a "Private Presale" of an AutoCAD 16 license. In my market research, I found that a company owned about 30 licenses of AutoCAD so they were very popular in my location, and the price is reasonable. After signing a contract with the company, I did the installation of software and hardware myself. By April 2015, I had run my first drawing and found that it was a great program. In this article, I am going to share how I purchased and used my only AutoCAD computer. By the way, if you want to use the same product, do not miss the "How to Buy" section. I will summarize my experiences below: 1. Make sure that the computer you need is the latest model and has a Graphics card that can run AutoCAD. The CPU and RAM will not matter. 2. Do not purchase a too old computer and a very expensive graphics card. I paid about $800 for my computer. 3. Check the Internet to find the best price. If it is for private sale, do not be afraid to bargain. 4. Check with the local market that if you get the license, they will provide a demo for you. I purchased my first computer in the fall of 2008. I was looking for a desktop computer to replace my old laptop. I liked the way a desktop computer could be more stable and powerful. I chose the latest Intel i7 based computer model, with 6GB RAM. It cost me $1,300. I know the price was high, but I did not think about the price in detail. I was satisfied with what I paid for my first computer. It was a refurbished computer from a computer store that did not do any warranty. I felt that the computer would last for many years. I also purchased a graphics card, the most important part of the computer. My computer had an Intel HD Graphics 3000 card. I purchased the Graphics card in the same computer store for $400. It is a high-end graphics card and seemed expensive at the time. I bought a new keyboard and mouse. The keyboard I chose was high-end and extra large. I
