
The Hunter Em Hack

Are there any mods/hacks for the classic hunter, I just want to dabble with different guns blowing up animals without having to root for 3 years. I currently only have 2 guns with their hand cannons, and I want to try something that makes me feel better I like some guns that can generate power, so as I go about my day, I want to feel better about it. I can think of the following: Customizable guns: I can feel differently with them. I can add weight on one end or give one light weight, so you can pick the one you like best.
