apeiron x is an exciting game developed by ambrosia
software. the users are allowed to shoot down waves of
worms, while avoiding the mushrooms. it uses 16-bit
graphics, yet the interface is rather well polished than
annoying. basically, you are chased by a green worm,
called pentipede, and you have to shoot it down. the
shooting field is full of mushrooms which require more
than one hit and may contain power-ups. killing the
pentipede isnt easy, since once hit in any other area than
head, it splits in two separate worms. also, from time to
time, the worm calls for allies, which are various animated
creatures that chase you with a high speed. the layout of
the game does not change with the increase of wave
number, but only the color of the mushrooms. when you
hit the worm, in the place you kill it will appear a new
mushroom. also, at the start of each wave, even more
mushrooms appear, making it more difficult to hit the
worm, but more likely to get power-ups. additionally, you

get bonus points if you finish the wave faster. apeiron x

elevator that falls through to a pit. 5ec8ef588b
