February 8, 2014 - I'm a new user. I need to establish an internet connection using an E173 Huawei modem. I tried to install the driver using Mobile... and it couldn't find drivers for my computer. Device "Huawei E173 USB Modem" appeared in Windows Device Manager. When trying to connect to the Internet, the modem gave the error "Failed to access the Internet." I was unable to successfully connect to the Internet with the E173 modem using a USB cable. I checked if internet was available via Wi-Fi and it was available. In my phone (LG-P715 Optimus L9 II) I disconnected all USB devices from the phone.
