## Filmora Split Video

# Download

besides editing videos online, filmora also provides more than 50 presets and 200 free effects to help you create professional-looking videos in a few minutes. and now we have filmora split video, which is easy to use and very handy. you can use this tool to split videos online and store the edited video as new video files. to begin, open the window and select the video you want to split, then choose the size of the file you want to split. when the size is correct, click on split button. the video will be split and be saved in the same folder. with this video splitting tool, you can split

---

any videos online in your computer. to edit the videos, you have to install the software and open the filmora video editor. then you can add videos, adjust the video size, and add video effects to your video clips. drag the split button to the timeline and release the mouse button. now, you should see a split screen effect in your video clip. you can also see in the image above that the video clips are placed in the timeline as well. the filmora video editor is the best application to split your videos with a few clicks. the video editor comes with the ability to open several media files at once, and it can automatically organize them into a playlist. the next thing you want to do is select which area you want to split the video to, and then choose the effect you want to use. after that, click on the split button to enter the split edit panel. after you have split your video into parts, you can use the trim tool to trim the sections that you want to keep from the video, or to trim unwanted sections from the video. to do this, drag the trim handles and adjust the length of each clip to exactly how you want to use the trimmed part of the video.
