Fundamentos de la administracion munch galindo pdf download.Q: Python logging with different colors for error and info I want to be able to print out information and errors to the screen in very different colors. The error messages should be in red and the info text in black. I used this import logging import sys logging.basicConfig(format='%(asctime)s - %(message)s - %(levelname)s - %(name)s - %(funcName)s - %(filename)s - %(lineno)s', level=logging.INFO) logger = logging.getLogger() logger.setLevel(logging.DEBUG) handler = logging.StreamHandler() handler.setLevel(logging.DEBUG) formatter = logging.Formatter('%(name)s - %(levelname)s - %(message)s') handler.setFormatter(formatter) logger.addHandler(handler) logger.info('oh, I am in black') logger.error('spam spam spam') but there is no red spam... what am I doing wrong? Thanks A: Try setting the StreamHandler color attribute to ERROR. I believe it's an 'unspecified' color so it'll match the default. Q: Appropriateness of [mugging] Mugging is not a popular topic here as no one wants to be mugged in their own home. The term mugging is defined by Merriam-Webster as: the robbery or attempted robbery of a person <https://www.merriam-webster.com/dictionary/mugging> On the other hand, the OED offers the following definitions: define 1 Mainly North American (a) robbery (of person) —orig. 19c., from mugger (b) ^[With object] the act of wresting an article from a person (especially a person's pocket) usually with a weapon or by force, esp. in a violent or rude manner. mugger share the sense of mugger b) n. A person who, usually armed, engages in robbery. 2 (also MUGG) n. An ordinary type of cap pistol. <https://www.oed.com/view/Entry/266967> In American English, the word mugging has a broader sense, referring to criminal activity in general.
