What about other applications? Well, you need to export your 3D models to a format that Lumion can read and import. As an example, let's export and import a model located at [www.felix.com/b/both/both/project.jpg](http://www.felix.com/b/both/both/project.jpg) . Experiment with different types of files, which I will provide in the action itself. Once you've exported your 3D model, import it into Lumion. Open Lumion and go to File > Import > Import . Click Import 3D Model and select Both . Select the model you are importing and click Open . Lumion will open the program you exported it to.
