The original filmzilla was intended as the first of a series of films that will be released in the future. Filmzilla is now the largest and best website devoted to Hardcore Adult Films in the world, with tens of thousands of new videos being released every day. Filmzilla offers several innovative and advanced features, including auto-play and auto-download of new premium videos. It also has an innovative video recommendation engine based on the users' likes and dislikes. Filmzilla also focuses on the brand's 10-year anniversary, featuring many of the company's greatest hits. Filmzilla has multiple viewing options such as fullscreen, smaller-sized modes, scrolling, and more. Escape from Wizard Mountain plays like the forgotten kid cousin of E.T.: The Extra-Terrestrial. A group of five orphaned kids are kidnapped by a pair of evildoers (named Aristotle Bolt and Evil Bolt) who kidnap them for their magic. The kids are in for a wild ride, starting with their take-off into outer space and in the latter segments of the movie, ending up for a two-hour ride on a giant rock (with carefakers Fred Savage and Kim Richards); fighting off rampaging dinosaurs (played by Eddie Albert, Fred Savage, and Kim Richards), and later on, battling a forest full of witches and evil wizards (including Ed Begley Jr.). The movie is horribly boring at times, especially when the kids are on a train, and there are some things that go on that are pretty much impossible. This is still a very fun movie, however, because you are all still in a child's mind, and that's where most things are fun. This film was made in 1979, and was remade in 2002 with a CGI Eddie Albert. ***1/2 from ****
