Arguably, the best game in the series just got even better with Blade Strangers.. The 7 best kids game will give you a chance to win the HD Nintendo Wii U consoleQ: How to install Joomla 3.4.3 on Hostgator with PHP 5.6.31 I would like to install Joomla 3.4.3 on Hostgator with PHP 5.6.31. I have setup a shared Hosting account with Hostgator. It has two different folders. An outside folder (PHP 2.0 XAMPP) and an inside folder (PHP 5.6 XAMPP). I have installed Joomla 3.4.3 according to this article (I have replaced the XXX below with my own information). When I run the installation I get an error saying: Error:'module and/or plugin is not installed' in E:\in_temp\htdocs\laravel\Joomla\com_mosra\vendor\joomla\joomla-cms\libraries\html\html.php on line 759 There is no installed file called: mosra_html_module_mosra.php. I believe this is the problem that is causing the installation to fail. I have tried to install the plugin manually but that doesn't work either. I have checked in the /libraries/joomla/filesystem/ and I found the mosra_html.php file. I am using Windows 10 (x64). I tried copying the files to the original host (PHP 2.0 XAMPP) but that didn't work. I could not find the mosra_html.php file there either. When I checked the PHPinfo on the original Hosting account, the PHP version is 5.6.31-0+deb8u1. If I go to preferences -> extensions and modules -> add I get the following error: Please install PHP 5.6.31 or above (it is recommended). I would really appreciate if someone could help me get this working. Thanks! A: This happens to me every so often. I will install the extension using FTP and after that I can update my Joomla installation. Other than that I find the best solution to a problem like this is to call your hosting provider and ask
