Changes all the permissions of the file or folder to the group or the user you want. You can also choose between the drop down

menu for changing them or using the text interface. When using the text interface, you can set the permission for all the files or folders in a single go or by picking a group/user from a list or typing the name of an individual. Download MacAddictAppsMacAddictApps is a fun and easy-to-use way to browse and download iPhone apps. Ease-of-use Functionality Product Quality Customer Support Value for money Ease of use is a big plus, but there are also other good options

available. Easy to use I was looking for an app to make simple changes to my iPhone and iPod touch apps, and this is the first one I have found that actually does what it says on the tin. To start off, I had to create an account, but it was really easy to do. I used the default settings and it works perfectly for me. You can make changes to the permissions of a file or folder easily and you can set them to a group of users, or individually for each one. You can also choose to change all of

them or just a few. There is a handy 'list all' button on the top of the window that will save you a lot of time and effort, because it only shows a list of the files and folders that are currently set to a particular permission. It's a really good app and I've been using it for a while now. I'd give it a five star rating, but there's just one feature I would like to see added. Ease of use The ability to browse for an app to download would be a useful addition. Functionality It works great for simple changes.

Product Quality The app is easy to use and has a good interface. Customer Support Customer support was good, it took a while to get a reply to an e-mail, but once it did, it was quick to respond. Value for money I used it for several months and it was the cheapest app I found for making simple changes to my iPhone and iPod touch apps. It will be the first time since the 1979 college basketball season that an undefeated Final Four team has not been crowned college basketball's national

champion. On Sunday, as Michigan State cruised past Texas, Duke narrowly edged Purdue to win the final game of the ACC Tournament and advance to a matchup with North Carolina in the tournament finals on Monday. The fact that the tournament is its own college basketball event sets up a unique story arc that begins with the Final Four, plays out over the next three days and, by Tuesday afternoon, will have propelled the winner into a matchup against Kentucky. With that

much riding on each game, the selection committee will no doubt be just as busy watching the games as the rest of us. Here is a look at how they will be distributed by the end of Sunday night.
