It's now much more difficult than it once was to create files that can accept adjustments, since before PS CS4 you had to make sure your image was saved in what appears to be a specific folder structure. Now, you can skip that part of the process and do everything in Photoshop. Additionally, PS CS4 lets you create a preview of how your work will look even before you look at any preview images, keeping the preview in sync with the final version. I find also that there are a few improvements all the way around. Images now open with fewer problems, even when larger files are involved. The new "scan" feature is a bit hit and miss at the moment – try it and you may find it useful, but personally, I feel that it's easier to manage all my photos directly from one folder into Photoshop. That works fine with my current USB stick, but you may want to move your files to drive-based space for better rigidity. Like many software developers, Adobe has a habit of emphasizing the features that they think will put them at the top of the heap. One of these is the "movie editor." By that I mean, the motion editor is one of those features that makes people forget about the fact that it's hard to do simple things like strap a digital camera to a tripod and take a decent night shot with it. For instance, if you enable "Activity Monitor," you can track the time it takes to import a single image. Simply put, you'll see when Photoshop gets going and when it gets going fast. If you're concerned about framerates, the activity monitor now shows you what's going on with your core. It's pretty simple to use, and I would go so far as to say that it's one of the best features in the latest edition of Photoshop.

Anyone can learn a technique, but if you don't believe in yourself, and believe in what you are selling, you are a victim of hoaxes and myths. A misinformed consumer base will always view a product as inferior. Once people believe that your product is complete crap, future sales become difficult, if not impossible. Develop a confidence, credibility, and authenticity. People are driven to spend money for things that they like and trust. If you sell them that your services are all they need to have a great life, they will pay for it. Create your credibility on the merchandise first, before you can get credibility with people. They know you more than you know them. Develop a culture. People won't trust you unless they know you to be a resource and reliable person. You will never really organize your clients in a helpful relationship without having a proper understanding of your role and authority. When the entire relationship is established, you will naturally misuse time and resources in the most positive way.
